

The Village Forestry Department has begun its third year of monitoring the water quality of Pine Lake as part of a partnership with the WI-DNR. The parameters sampled include water clarity, temperature, phosphorous, chlorophyll, and dissolved oxygen. The findings suggest the water quality of Pine Lake is very good and above average for southeast Wisconsin.

Date Collected	Water Clarity Depths for Pine Lake Depth of Reading
5/21/08	39.5 feet
6/02/08	40.25
7/09/08	27
8/01/08	21.5
9/03/08	14
10/09/08	22.5
