Does Your Driveway Meet Emergency Standards?

2018 has been a prolific growing year for most of our trees and shrubbery. For some, this growth has resulted in driveways starting to “tunnel” in. In the event of an emergency, all driveways need to be large enough to support an emergency vehicle. This means that brush and tree limbs must be cleared to allow for a **12’Wx12’H opening**. Failure to do this can result in slower response times and damaged emergency equipment.

Additionally, please be mindful of your driveways current condition. Driveways that are cracked or developing pot holes are extremely taxing on the village plow equipment and should be considered for repair or replacement.

Excessive Shrub & Tree Growth

If you are having difficulties seeing oncoming traffic while pulling out onto Chenequa’s main travel corridors due to excessive shrub or tree growth, we can help. Our highway/forestry department will happily remove whatever shrubbery/tree growth necessary to reduce blind spots.

Please email clincoln@chenequa.org
about your concerns.
