## Phishing Email Alert

The Cybersecurity and Infrastructure Security Agency (CISA) is aware of an email phishing scam that tricks users into clicking on malicious attachments that look like legitimate Department of Homeland Security (DHS) notifications. The email campaign uses a spoofed email address to appear like a National Cyber Awareness System (NCAS) alert and lure targeted recipients into downloading malware through a malicious attachment.

- Be wary of unsolicited emails, even if the sender appears to be known; attempt to verify web addresses independently.
- Use caution with email links and attachments without authenticating the sender. CISA will never send NCAS notifications that contain email attachments.

## Lawn Fertilization & Buffer Zones

There is absolutely no fertilizer allowed within 20 feet of North & Pine Lakes. Lawn fertilizer beyond 20 feet must be phosphorous free. This has been the law since 2008 and you can be ticketed and fined.

Fertilizing within 20 feet of the lake, in addition to being illegal, negatively effects the lake. It causes algae and aquatic plant growth. This also reduces water clarity on the lake you and your neighbors live on. With the cooperation of all lake residents, we can assure a better tomorrow on the lake.
